

COMMAND & CONTROL OF HOMEOPATHY

Homeopathic medicine is all about allowing the body to heal itself through natural substances. It is one of the most remarkable forms of healing with published studies that can be impactful to even the most skeptical critique.

Sources of the natural substances like plants, minerals, and animals are used to prepare homeopathic dilutions to the *nth* potency such that the selected substance is repeatedly diluted to its final product in which no particles or molecules of the original source remains other than its energy frequency.

POWER OF HOMEOPATHY

Homeopathy helps the body to become more susceptible to how it reacts to the symptoms of the disease and slowly allowing the symptoms to subside thus healing the body. This, in turn, will gradually disallow the disease from recurring.

Every disease is the outcome of derangement of the vital force

Every disease is a result of high levels of inflammation

All disease begin in the gut

- When a remedy is taken, the body receives this message and steps up its **Vital Force** (that being the natural healing energetic force within the body).
- The remedy will then determine the most paramount symptom(s) manifested through its pathological pathways and character of symptom(s).
- With this powerful defense mechanism, the therapeutic law of nature will take place - only the stronger which can fight and destroy will survive.

HOW DO I PERCEIVE HOMEOPATHY?

Physical disease is most often triggered by mental and emotional components.

In any illness with several symptoms, whether acute or chronic, it is safe to select the mental/emotional ones over the physical. The mental/emotional symptoms always dominate. This can, and will over time, develop into physical symptoms. This can also evolve from acute to chronic.

HOMEOPATHY IS AN ART AND A SCIENCE...

It is an ART - art of listening:

- To essentially connect with the person being treated
- To observe and listen to what they are saying
- To consider their body language as often times it may contradict with what they are saying
- To look for hidden signs if they might act like everything is fine but intuitively, I feel that is not the case

It is a SCIENCE - with mental and physical components:

- To pick up on the above and get to the essence of what is really going on with the person
- To be able to wholeheartedly communicate with what is being sensed with the person and help them to more fully and openly express themselves
- To be able to feel compassionate to relay the triggers
- To help the person achieve ultimate wellness
- To genuinely connect with the person, from a heart-centered space that combines courage and skills, and meet the person in that 'space' - for THIS is where magic begins to happen to help move forward with healing AND leave an energetic imprint that will last a long time.
